Unique Customised Items

As well as our existing standard products we can supply unique bespoke items for your school.

Large Outdoor Installations

7.6 metre (25 feet) front installation at St Bede's Primary School

- Customised design with school's name and motto
- Exterior grade-grey backed vinyl using fade-resistant opaque inks
- Cut to shape

Colourful Acrylic Window Panels

6 Acrylic panels installed at St Nicholas Breakspeare School

- Printed solid acrylic panels with fade-resistant inks
- Cut to shape and inset to windows

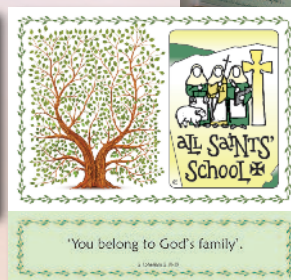

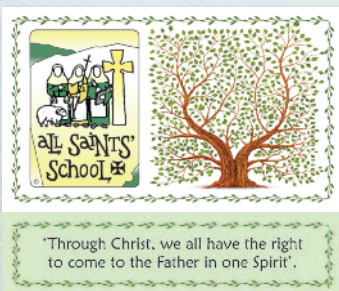

Project & brief: The school had converted an old classroom into a chapel and were holding services in the room but it was felt to be cold, unfriendly and the non-opening windows overlooked a brick wall in the playground. We were asked to suggest a way to make the room more suitable for its purpose and to be a more prayerful and contemplative space.

Reception / Office Signage

5 Rigid PVC (Fomex) panels installed at All Saint's School

Project & brief: The office and reception staff at the school felt like they were working in a 'goldfish bowl' and had taped up pieces of blue paper over the large office windows for some privacy.

They gave us their vision statement text and school logo with a rough layout of what they wanted. We designed and supplied 5 Foamex panels that were inset into the windows.

- Rigid 5mm thickness PVC indoor window panels
- Fade-resistant inks
- Custom size to fit
