

Processional Pole instructions

IMPORTANT – BEFORE ASSEMBLING:

The 2 short cross sections are colour coded. One of the screw threads is marked in black and matches up to the thread in the upper vertical pole which is also marked in black.

DO NOT OVER TIGHTEN THE SCREW THREADS !

There are 4 parts to the pole:

- Upper vertical section (large finial at top)
- Lower vertical section (no finials)
- Left-hand short section
- Right-hand short section

Assembling the pole and hanging the banner

1. Lay the banner face down on a clean, dry smooth surface.
2. Check which one of the screw threads on the short sections is marked in black and match it to the hole in the upper vertical section. Do not screw it in yet.
3. Lay the upper vertical section on the reverse of the banner.
4. Feed the *correct* left-hand short section (see note 2 / fig.1) through the loops of your banner and screw it in to the hole in the upper vertical pole. **Do not over tighten!**
5. Feed the *correct* right-hand short section (see note 2 / fig.1) through the loops of your banner and screw it in to the opposite hole in the upper vertical pole. **Do not over tighten!**
6. Screw the lower vertical section into the upper vertical section. **Do not over tighten!**

Fig.1 – Make sure you screw the correct short section into the correct hole.

Fig.2 – Upper section with the short sections attached.
